

VIRAJ MANE

Chh. Sambhajanagar, Maharashtra, India | +91 9822013754 | virajm0812@gmail.com
LinkedIn | GitHub

Education

Bachelor of Technology , Vellore Institute Of Technology Major: Computer Science Engineering	Expected May 2026 CGPA: 8.22/10
JISA , Chh. Sambhajanagar, Maharashtra 12th Standard (CBSE)	Jul 2022
PODAR International School , Chh. Sambhajanagar, Maharashtra 10th Standard (CBSE)	Mar 2020

Technical Skills

Python, Java, C++, HTML, CSS, Next.js, WebSockets, RESTful API, Docker, GitHub Actions (CI/CD), AWS, MySQL, MongoDB, Git, Postman, Computer Vision, Blockchain, Web3

Projects

ODIN – AI-Powered NFT Marketplace with Smart Wallet Chatbot July 2025

- Built **ODIN**, an AI-driven NFT marketplace integrating smart contracts and a chatbot for wallet-based blockchain operations.
- Created a **RAG-based chatbot** that helps users query wallet data and perform actions such as buying NFTs and transferring ETH.
- Added **wallet signature verification (EIP-191)** for safe and trusted user authentication.
- Developed **smart contracts** for NFT minting, listing, and ownership transfers.

Thermal Surveillance System April 2025

- Developed a **thermal surveillance solution** using YOLOv8 and Faster R-CNN for low-visibility environments.
- Achieved **high detection accuracy** on thermal video data.
- Enabled **real-time visualization** of thermal detection outputs through Unreal Engine 5.
- Built a **web dashboard** for real-time visualization and control of thermal camera inputs.

HustleHouse - Full-Stack Music Streaming Application December 2024

- Built a **Spotify-style music streaming platform** with real-time audio playback.
- Implemented **JWT-based authentication** to secure user sessions.
- Designed **RESTful APIs** for managing users, playlists, and streaming data.
- Implemented **admin privileges** for managing songs, playlists, and application content.

SysMon – Real-Time System Monitoring Dashboard (DevOps Project) Feb 2026

- Built a **real-time infrastructure monitoring dashboard** using a modern full-stack JavaScript architecture with WebSockets, integrating backend system data collection for CPU, memory, disk, and network metrics.
- Integrated **Docker container monitoring** to display live CPU, memory usage, and uptime.
- Containerized the app with **Docker** and implemented **CI/CD using GitHub Actions** for automated image builds.

Coursework

- **NPTEL Cloud Computing** — Cloud architecture, virtualization, service models (IaaS, PaaS, SaaS)
- **Google: The Bits and Bytes of Computer Networking** — Networking fundamentals, TCP/IP, DNS, HTTP

Additional Information

Languages: English, Hindi, Marathi
